

# JavaScript Full Stack Web Developer

*Want to code on maps that matter?*

*Join nazka*

nazka mapps is developing innovative mapping applications and location-based API's. We focus on applications with added value to society. Right now, we are looking for an enthusiastic full stack web developer with experience in JavaScript (Node.js, React, Redux).

## We welcome you with

- ✓ An open and **modern** management with lots of development **opportunities** and growth
- ✓ An expanding team that supports you. We let each other **grow**
- ✓ Work **flexibly** at **Leuven, Mechelen** or at **home**
- ✓ Eye for good **work-life balance**
- ✓ An interesting **mix** of local, international projects and proprietary products
- ✓ A **nice salary package** with fringe benefits (meal vouchers, mobile, laptop,...)

## You have

- ✓ a bachelor/master degree in IT (or convince us if you think that is not necessary for the job)
- ✓ 2-10 years of **experience** in JavaScript (mainly Node.js, React, Redux) and API-development
- ✓ experience or strong interest in working with web **map** applications (Leafletjs, Mapbox, WebGL)
- ✓ knowledge of NoSQL **databases** (MongoDB)
- ✓ worked with AWS before
- ✓ agile mind-set and **hands-on** mentality
- ✓ a **testing-attitude** and strong focus on **quality**
- ✓ strong **communication** skills

## Moreover you are

- ✓ eager to **learn** and open minded
- ✓ a **team** player, helpful, you want to win together
- ✓ **passionate** with scrum development and coding for fun
- ✓ in favour of **open** source and open data
- ✓ interested in maps and **geographical** applications

## You will contribute to

- ✓ The development & implementation of our **map applications** (mapps) and **API's** (focus is on JavaScript)
- ✓ **Development** and maintenance of the back-end building blocks (server, databases, storage, AWS-management)
- ✓ The follow-up of new technologies to continually improve **components, modules** and **stack**

## Interested?

Convince us with your enthusiasm and resume
